

SOVEREIGN

The Resilience Checklist

Nine areas, forty questions. Not a worst-case fantasy — the ordinary things that break first when a job, a bank, a network, or a body stops cooperating.

WATER

- ☐ At least 2 weeks of stored drinking water (1 gallon / 4L per person per day)
- ☐ A way to purify more — filter, tablets, or boiling capability, not just stored bottles
- ☐ You know where your water actually comes from and what shuts it off

FOOD

- ☐ 2–4 weeks of food that needs no refrigeration or power to prepare
- ☐ A way to cook without mains electricity or gas (camp stove, fire, etc.)
- ☐ You know which nearby land, water, or contacts could realistically supply food if supply chains broke for a month

ENERGY

- ☐ A way to keep essential devices charged with the grid down for 72+ hours
- ☐ You know your home's actual daily power draw, not a guess
- ☐ At least one heat/cooling option that doesn't depend on mains power

FINANCE

- ☐ 3–6 months of essential expenses in a cash emergency fund
- ☐ Savings are not all in a single bank or single account type
- ☐ Some physical cash on hand for when card networks or apps are down
- ☐ Household income doesn't depend entirely on one employer or one client

HEALTH

- ☐ You train strength and cardio, not just one or neither
- ☐ You could describe your own sleep and stress patterns accurately, not just guess
- ☐ A stocked first-aid kit, and at least one person in the household who knows how to use it

IDENTITY & DOCUMENTS

- ☐ Physical copies of core ID documents stored somewhere other than your main residence
- ☐ A second, independent way to prove who you are if your primary ID is lost or destroyed
- ☐ You know the actual process to replace a lost passport, licence, or birth certificate

COMMUNICATION

- ☐ A way to reach family if mobile networks and internet are both down
- ☐ An agreed meeting point or check-in plan the whole household actually knows

HOME & SECURITY

- ☐ Working smoke and CO detectors, checked in the last 12 months
- ☐ You know how to shut off your home's water, gas, and power manually
- ☐ Basic tools and materials on hand to secure doors, windows, or a leak without a hardware run

COMMUNITY

- ☐ You know at least two neighbours well enough to ask for or offer real help
- ☐ You have a role, skill, or resource you could actually contribute if your street needed it

sovereign — a practical guide to self-reliance, built one domain at a time.
